

NEW!

Copy Curve Segments

Copy, paste, or duplicate pieces of existing curves with the Copy Curve Segments feature that allows you to reuse curve segments in your projects.

NEW!

Gaussian Blur feature

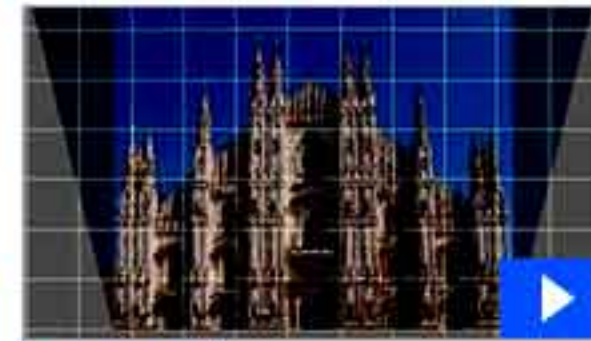

Explore the Gaussian Blur lens, featured within Corel PHOTO-PAINT, for non-destructive blur effects. Adjust the degree to which the drop shadow feathers at its edges in CorelDRAW so you can control the perceived distance and size of objects against the background and other elements.

NEW!

Healing Clone tool

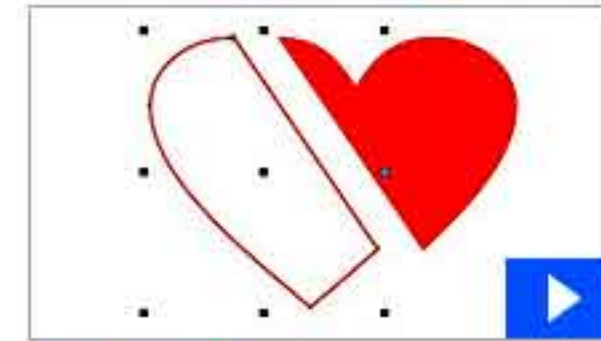

Improve your favorite photos with powerful new tools to correct and edit in a variety of ways. Try the new Healing Clone tool to remove imperfections by blending them with surrounding colors and textures. Explore the many professional photo-editing tools within Corel PHOTO-PAINT.

ENHANCED!

Straighten Image dialog box

With the enhanced Straighten Image dialog box in CorelDRAW and Corel PHOTO-PAINT, you can now correct perspective distortions in photos that have straight lines and flat surfaces such as architectural photos and photos of buildings.

ENHANCED!

Knife Tool

With the revamped Knife tool in CorelDRAW, split any object or group of objects – vector, text and bitmaps – along straight, freehand or Bézier lines. Create a gap between the new objects resulting from the splitting action or overlap them. Choose an outline option, or let the application automatically select the option that best preserves the outline appearance.

NEW!

Workspace customization

Be productive immediately with a workspace that matches your workflow needs. Simply adapt your design space by changing the appearance of your commonly used elements: alter the desktop and window borders color, customize the icons and text size. Work your way!

NEW!

Startup assistance

Whether you're a first-time user or an experienced designer, CorelDRAW Graphics Suite X8 makes it easy to get started. Learn the basics, see what's new with a Startup tour, or transition to the suite with a special tour designed just for Adobe users. Be productive immediately with a workspace that matches your workflow needs, and benefit from high-quality content and versatile in-product learning.

NEW!

Border and Grommet dialog box

The new Border and Grommet dialog box lets you create a banner from a page or from selected objects on a page. Whether you work on small-scale projects, such as logos and web graphics, or larger pieces, such as banners and car wraps, CorelDRAW will deliver the output you need.

NEW!

CorelDRAW & SDK Developer Community

Create your own automation tools with support from the new CorelDRAW & SDK Developer Community site: community.coreldraw.com/sdk. Explore a variety of useful resources for this graphic design software, including in-depth programming articles and fully searchable API references, which can help you automate tasks with macros and create custom tools.

NEW!

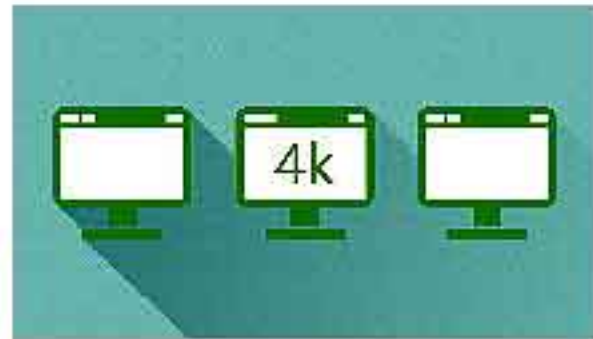

Get More docker

Expand your collection of creative tools by downloading applications, plug-ins, and extensions directly from within CorelDRAW and Corel PHOTO-PAINT. You can download your free license of Corel Website Creator, purchase AfterShot Pro for the ultimate RAW workflow, experience Corel ParticleShop for amazing bitmap effects, and more.

ENHANCED!
Compatibility

Get the power and stability you need with full support for Microsoft Windows 10 and discover how its innovative features can augment your graphic design experience, plus enjoy existing support for Windows 10, 8.1, and 7. Expand your compatibility options with the latest file formats, including AI, PSD, PDF, JPG, PNG, SVG, DWG, DXF, EPS, TIFF, DOCX, PPT and more.

NEW!
Multi-monitor, 4K and Real-Time Stylus support

Take advantage of the new multi-monitor viewing and 4K displays support. Work quickly and efficiently with the added control from the Windows Real-Time Stylus pen-compatible tablets, such as the Microsoft Surface, in addition to the Wacom tablet and devices.

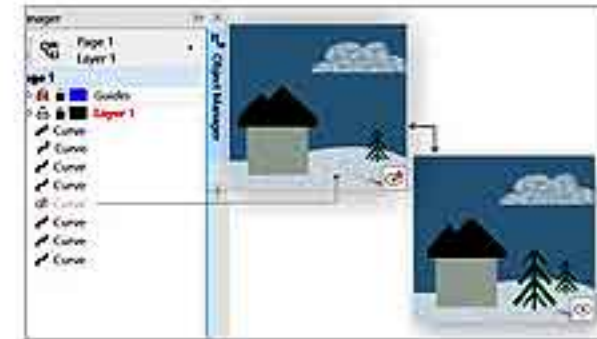

NEW!
Corel Font Manager

Explore, handle and organize fonts with the new Corel Font Manager to satisfy all your typeface needs. Manage your typeface and font collections with ease, and use fonts without having to install them. We've got you covered for every profession that uses fonts daily, from graphic design, publishing and illustration, to package design, sign making, advertising and website design.

ENHANCED!
Font filtering and search

Save valuable design time with the enhanced font filtering feature. Quickly find the specific font you need without spending time searching in multiple folders. For example, if you're looking for a typeface that has a handwritten appearance, you can do a quick search for "script fonts." The font list will automatically update to show all the fonts on your machine that match that search.

NEW!
Show Objects

You asked for it, and we listened! Take advantage of the new important design features that we created based on feedback from CorelDRAW users. Manage complex projects with ease by using the new Hide and Show Objects feature that lets you hide individual objects or groups of objects on a layer without hiding the entire layer.

ENHANCED!
Easy, professional website design

Corel® Website Creator™ makes website design easy for everyone. Now, you can add high impact video and audio, embed online apps like Google Maps, and keep track of your site's success with built in SEO tools. With templates and SiteStyles, support for CSS3 and HTML5 capabilities, you can quickly design, build, and maintain interactive and eye-catching websites without learning how to code. [Learn more](#)

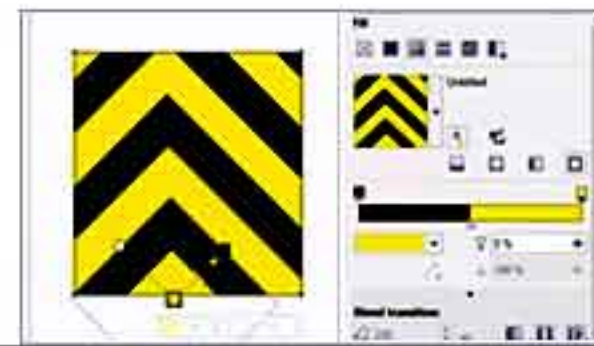

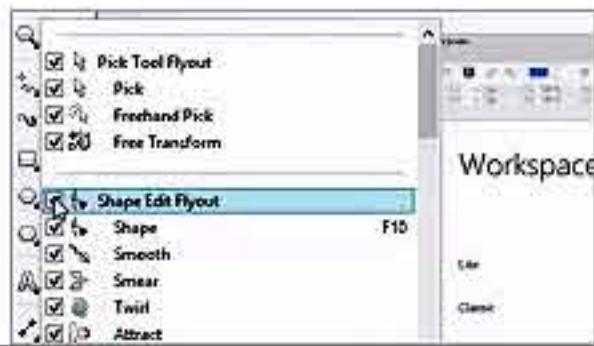

ENHANCED!
Learning materials and expert tips

Whether you're a seasoned graphic professional or an aspiring designer, you may want to learn a new trick. We're here to help with our growing library of dynamic learning materials, including video tutorials, webinars and insights from the experts. Plus, our CorelDRAW Hints offer training videos and tips from right within the application.

NEW!
Royalty-free, quality content

Keep your designs fresh with more than 10,000 royalty-free clipart and 2,000 high-resolution digital images, 1,000 OpenType fonts, 350 professionally designed templates, over 1,000 fills, frames and patterns—all included with this graphic design software.

Redesigned, fully customizable interface

Our flexible tools and settings reflect your natural workflow, so everything is right where you need it, when you need it. Choose between Lite, X6 Inspired or the Default workspace to get started smoothly, then use the new quick customize feature to tailor your toolbox and property bars to suit your needs.

Specialty workspaces

Several pre-defined workspaces are available to help keep all the tools specific to your industry organized and easily accessible. Choose between Page Layout, Illustration, or set your workspace to look like Adobe Photoshop or Illustrator to help ease the transition from Creative Suite.

Total control over fills and transparency

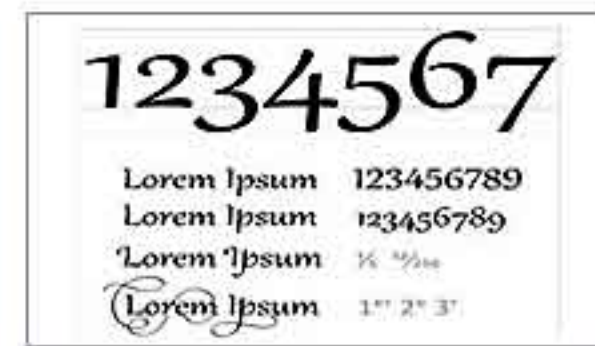

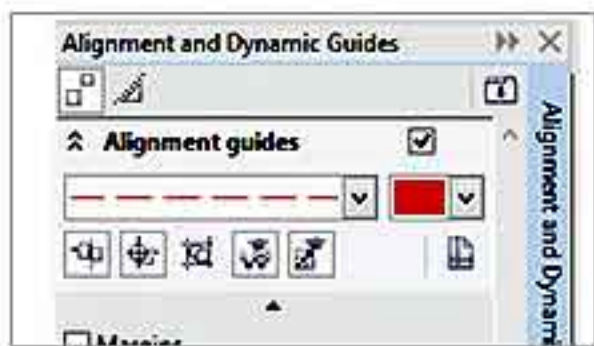

We've created our most powerful fill engine ever, giving you complete control over your fountain, bitmap pattern and vector pattern fills. Create elliptical and rectangular fountain fills, control transparency within the individual colors of a fountain fill, repeat a fountain fill within an object and more.

Easy font preview and advanced character tools

Find the perfect font for any project. The Font Playground lets you preview and experiment with different fonts before bringing them into your design. Plus, the revamped Insert Character docker automatically shows you all the characters, symbols and glyphs associated with your font, making them easier than ever to find and insert.

Special effects and advanced photo editing

Explore special effects, including four new pressure-sensitive Liquid tools—Smear, Attract, Repel and Twirl—and new camera effects—Bokeh blur, Colorize, Sepia toning and Time Machine—to create unique images in Corel PHOTO-PAINT X8. RAW file support for over 300 types of cameras gives you even more ways to enrich your images. [Learn more](#)

Precise layout and drawing tools

Make sure every element on the page is right where you want it with enhanced layout features. The Alignment Guides help you position objects quickly, appearing on the fly with suggested alignments to other nearby objects. The Outline Position options let you pick whether an outline is positioned inside the object, outside the object, or an equal combination of both.

QR code generator

Create and add unique QR codes as a mobile marketing tool on your designs. Add text, images and colors to your codes to make them stand out, or blend in—the options are endless! Built-in validation ensures your QR code is fully functional and can be read on major smartphones and scanning apps.*

Built-in Content Exchange

Explore the new Content Exchange*, an online repository that's fully integrated with the suite's applications. Share fountain, bitmap pattern and vector pattern fills with our community of users from right within CorelDRAW. Get inspired, showcase your handiwork and upvote the ones you like best.

Advanced OpenType support

Create beautiful text with advanced OpenType typography features, such as ligatures, ornaments, small caps, swash variants and more. Ideal for cross-platform design work, OpenType offers comprehensive language support, allowing you to customize characters to suit the language you're working with.

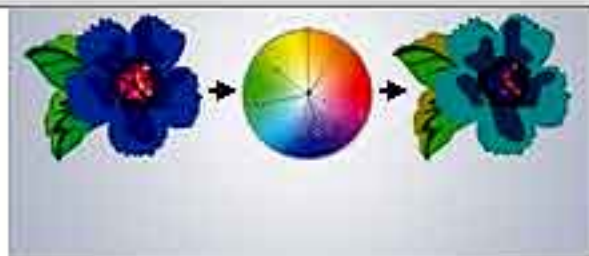

Complex script support

Working with Asian and Middle Eastern languages is easy, thanks to key features in CorelDRAW that ensure proper typesetting. Complex script support acts the same way as OpenType fonts, modifying characters as you type to deliver contextual accuracy.

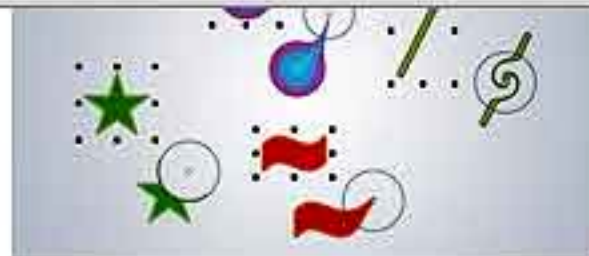

Document styles

The Object Styles docker simplifies the creation, application and management of styles. Take advantage of Style Sets that make it easier to apply consistent formatting across multiple objects, produce iterative versions, and format whole documents quickly and consistently.

Custom-built Color Harmonies

Easily create a complementary color palette for your design. The Color Harmonies tool combines Color Styles into a Harmony, allowing you to modify colors collectively. It also analyzes colors and hues to deliver complementary color schemes—a great way for you to satisfy clients with variety!

Creative vector shaping tools

Add creative effects to your vector artwork. Four shaping tools—Smear, Twirl, Attract and Repel—let you refine your vector objects by pushing, pulling, smudging, making indents and more.

Page layout tools

Creating complex layouts and designs is easier than ever with enhancements to well-loved page layout tools. Reserve a place for text or graphics with an empty PowerClip frame. Use the Placeholder Text tool to mock up a page layout and get a sense of how the text will look. Plus, easily add page numbers with automatic page numbering.

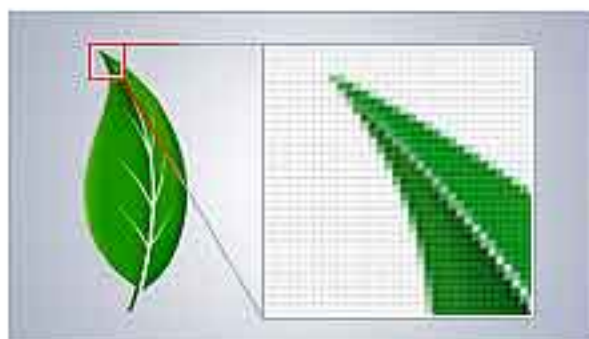

Native 64-bit and multi-core support

Get your designs ready fast with native 64-bit support and multi-core processing power in this graphic design software. You'll see results in less time, work without hiccups while running multiple applications, be able to open and edit more large files at once, and process larger files and images faster than ever.

Powerful color management engine

Control color consistency across different media and create a distinct color palette for each document. The color management engine includes greater color accuracy, plus support for the latest color profiles from PANTONE. Reduce costly reprints by knowing that your colors are accurate before you print.

Web graphics tools

Develop captivating web content and graphics with CorelDRAW's collection of web graphics tools. The Pixels mode shows you exactly how your content will display online, and the Export Dialog box lets you compare file formats before export, so you can optimize your settings to achieve the highest file quality.

Easy bitmap-to-vector tracing

Don't waste precious time converting bitmap images into vectors. The advancements to the built-in Corel® PowerTRACE® engine provide the best tracing results yet and turn the most demanding bitmap images into high-quality vector objects.

Built-in content organizer

Find content quickly using Corel CONNECT, our built-in search tool that helps you browse and locate your assets, then organize and group content by type or project. You can sync your trays with Microsoft OneDrive, so you always have access to the latest versions of your projects from other computers and mobile devices.
